Passionate QA Engineer with a B.S. in Information Technology and strong experience in software quality assurance, automation, and cybersecurity. Currently working at Theoria Medical, leading end-to-end test strategies, creating CI/CD pipelines, and executing API, performance, and penetration testing. Adept in tools like Playwright, Cypress , GraphQL, and Jira. A cybersecurity enthusiast with multiple certifications. Write and understand test cases, create test plans and identifying use cases. Comprehensive understanding of full software development lifecycle.

WORK EXPERIENCE

Software QA Engineer
Theoria Medical PLLC

06/2023 - Present   *Novi, Michigan*

Achievements/Tasks

- Developed and maintained comprehensive test plans, scripts, and cases for medical-based applications across Windows and iOS. Conducted manual and automated testing using Playwright, QASE, and JIRA, covering unit, regression, E2E, and API tests. Ensured compliance with US healthcare guidelines for applications built in React and Dart/Flutter. Actively contributed to the development pipeline by proposing preventive measures and action plans to reduce potential bugs.

Lead QA Engineer
Innovuze Solutions Inc.

12/2022 - 06/2023   *Cagayan de Oro City*

Achievements/Tasks

- Led the QA team and managed testing processes across projects. Mentored junior testers and maintained automation scripts.

Software QA Engineer
Innovuze Solutions Inc.

07/2022 - 12/2022   *Cagayan de Oro City*

Achievements/Tasks

- Performed manual and automated testing on web platforms. Collaborated closely with developers to resolve bugs early in the SDLC.
